WHAT ARE THE HIDDEN RISKS OF NAIL SALON PEDICURES?

Getting a pedicure at a nail salon is a beloved routine for many, but it comes with risks that can affect both the appearance and health of the feet.

Nail Fungus Results

Nail fungus is a condition that occurs when a microscopic fungus enters one or more nails.

This condition often begins as an infection in the skin called tinea pedis, which is commonly referred to as athlete's foot.

Before & Afters

At Gotham Footcare, we take pride in offering the latest technology to treat nail fungus.

ClearANail, the treatment that we use, is a safe and painless new procedure that can safely drill barely visible

microholes through the nail to allow anti-fungal medication to reach the infection.

- ☑ Only two visits are required. One for the procedure and another for the follow-up.
- ☑ See results in as early as 2–8 weeks with no recovery time needed!
